ASTOR, LENOX AND TILDEN FOUNDATIONS
R 1917 L

A

Adulterations, Law against 32
Antiseptic properties of cinnamic acid 32
Artificial indigo 34
A remarkable suit 51
Acids and fats, Estimation of 70
Anti-Standard papers, More 74
Allegheny fields 74
Artificial fertilizers, The trade in 99
American and Caucasian petroleum. Splitting up the hydrocarbons of at low temperatures 130
Ammonia sulphate, Review of &c 132
Acids, A prospective advance in 147
Alcohol, The export trade in 149
Arsenic, The characteristics and properties of 177
Artificial indigo 179
Asbestos paint 179
Anchor white lead works 209
Adulteration bill, The national 225
Aniline oil and salts 227
A new field 315
Allegany, production of 315
Acetates, The 323
Aniline patent cases, The 389
Alcohol, The production of 437
Azo colors, Some new 467
Aluminum sulphate, Commercial 468
Anti-Standard movement, A formidable 502
Aniline patent case decision 515
Atlas deal, The 531
Adulterated drugs 531
Alcohol tax, The 532 612 1148
"Atlas," A chapter on the 554
Ammonia manufacture in England 563
Anti Standard move at Columbus, Success of the 564
Anti-Standard movement in Kansas 565
Aniline chemistry, Wonders of 615
A few personal remarks 631
Alcohol market, The 633
Artificial alizarine in England, Manufacture of 663
American musk 682
Alleghany wild cat, The 732
Alcohols, Disinfection of impure 733
Alkali, Method of manufacturing 763
Artificial carbonated drinks, The inventor of 763
Ambler & Co's failure 812
Atlas refinery, Sale of the 817
Anilines, Project for removing the duties from 881
Artificial alizarine, Improved formula for 915
Antiseptics, Relative power of 968
Adulteration of tar colors 1021
Antiseptic compound, A new 1022
Alumina, The commercial sulphate of 1074
Alumina, Manufacture of the sulphate from bauxite 1096
Alkali waste, Recovery of sulphur from 1097
Aniline colors, The manufacture of 1127, 1181
Alum from bauxite, Manufacture of 1152
Annual meeting of the Drug, Paint and Chemical Exchange 1258
Apollinaris water again 1259

B

Bully-tree gum 7
Bristles, The advance in 32
Bleaching chlorides, Determination of chlorate in 36
Benzoic acid, Manufacture of 37
Black death 122
Barytes sulphate, The trade in 147
Buffalo oil refineries, The 171
Bleaching powder, Oxygen from 179
Boston Druggist's Association 197
Buffalo interests, The Standard and 219
Boston as a chemical market 243
Brimstone market, The 339
Bad Standard oil in Louisville 353
Benzole and coal tar naphthas, Commercial 363
Blue color, Method of preparing a 371
Barrels, The trade in empty 507
Bleaching powder 564
Boracic acid, Notes on 683
Butler County gusher 684
Bitterns from the manufacture of salt, Utilization of 785
Bronze powder industry, The 834
Beans, Sea 866
Bergamot and lemon oils, The advance in 934
Baltimore, Petroleum trade of 936
Bitumen, A few notes on 991
Bauxite, Manufacture of sulphate of alumina from 1152
Boracic acid in Italy, The production of 1152
Boro-glyceride, Notes on 1236
Barytes, important suit 1258
Bird-Mordant Case 1287

C

Chinese method of manufacturing vermilion 7
Colorado as a petroleum producer 26
Cinnamic acid, Antiseptic properties of 33
Chemicals and the tariff 35
Chlorstein bleaching chlorides, Determination of 36
Cinchona cultivation in Jamaica 81
Cottonseed oil in olive oil, Detecting 123
Colors, Popular science of 197
Commercial fertilizers, The use of 228
Chemical works in a volcano 228
Cloves and nutmegs 229
Chemical market, Boston as a 243
Collar, The young refiner and the 244
California, Oil in 314
Columbus, History of the Standard's march upon 314
California Petroleum Review 315
Crystallizing salt solutions, Table on the concentration of 323
Cottonseed oil market, The 339
Calcium compound, Some Industrial uses of 341
Coal oil, Shall it be inspected 358
Colza oil 358
Canada, Smuggling oil into 362
Coal tar naphthas, Commercial, benzole and 363
Canary seed, The position of 387
Canadian tariff changes 390
Castor oil in England 390
Cottonseed oil mill, A new 410
Chess-Carley Co's oil 410
Caustic soda 437
Colors, Uniform names for 437
Colors, Production of 438
Cleveland, An independent pipe line to 458
Coal tar chemistry 459
Chinoline compounds 467
Camphor 467
Commercial aluminium sulphate 468
Cinchona barks and their alkaloids 484
Cinchona cultivation 563
Croton oil 563
Cottonseed and olive oils, Relative properties of 563
Columbus, Success of the anti-Standard movement at 464
Chemical anomaly, A 565
Cochineal, Adulterated 565
Carmine market, The 579
Cottonseed oil manufacture 604
Chloride of sulphur, Manufacture of 612
Cod liver oil, A menace to 616
Caroba, Arrival of sarsaparilla 661
Chemical tests, Governmental 682
Coloring matters prepared by the action of aromatic nitro-substition products 713
Chamber of Commerce and the tariff, The 733
Contract system, The rebate 760
Carbonated drinks, The inventor of artificial 763
Contract plan, The 781 833 913
Cottonseed crushers' convention 781 1226
Chemical industry of Germany 812
Contract plan, Indorsing the 812
Chemical synthesis and its progress 913
Carmine adulterations, Chemical tests of 915
Cottonseed oil mills, A plea for small 934
Cottonseed crushers, Preliminary convention of 935
Cymene from turpentine 937
Conspiracy, A history of a 989
Chemical society, A new 990
Colors for the Bureau of Engraving and printing, Proposals for 1019
Commercial travelers, Law relating to 1042
Cinchona barks, Assays of 1073
Commercial sulphate of alumina 1074
Caught in the act 1093
Crude petroleum, The value of 1093
Colors, The coming 1096
Chemistry, Review of Industrial 1097
Contract p'an on proprietary articles 1039-1124
Cottonseed refineries, Improved machinery for 1153
Cottonseed oil market, New York as a 1201
Chemical manufactures of the United States 1202
Cobalt in the arts 1236
Caucasian petroleum, Sulphuric acid in 1237
Commercial fertilizers, The cost of 1237
Competition, fair, and Standard Oil Co. 1255
Cinchona, Cultivation of in Jamaica 1259
China, Quicksilver and Vermillion in 1287
Cottonseed-oil duty, effect of on Italian trade 1289
Chlorates, Their uses in industry 1289
Cottonseed-oil, Foreign trade in 1255

CORRESPONDENCE:

Petroleum as fuel 4
How turpentine is distilled. The Standard's "Black Death." The duty on glass 52
Fair play? 101
Ammonia as a fertilizer. Refining paraffine wax. Lubricants for railway cars. Greensburg oil fields 148, 149
Lubricants for railway cars 244
The Baby act. Is it a Stalwart brand? 245
Linseed oil presses. White Japan 292
Druggists' price currents 340
The independent refiners. Cold test oils. Filtered oils. The owl as an emblem of wisdom 388-9
Druggists' price currents again. Branding, not taxing glucose 436
About filtering oils 484
Oil as an investment. How turpentine is gathered. Cylinder stocks. Test for burning oils. Card from Messrs. Whitthoff, Marsily & Co 533
The conspirators. Cotton oil manufacture 580
Practical work against the Standard. The adulteration of drugs 634
Cottonseed oil manufacture. The adulteration of drugs. The Conspirators. Standard discrimination 680
The adulteration of drugs. The conspirators 730
The importance of cheap alcohol. The Standard and the railroad purchasing agents. The profits of cottonseed oil manufacture. The conspirators 783
Coal tar benzoles. An imposter at large 834
Proprietary goods and the contract plan. The conspirators. Star route and Standard 882
The swindler Roseweig. Undertest oils in New England 935
Removing the duty from Anilines. The proprietary association. The Standard and the cottonseed oil business 988
The proprietary medicine association. The contract plan. Flaxseed crop prospects 1041
Standard undertest oils 1094
The reduction in cylinder oils. Outwitted at last. The proprietary rebate plan. A Southern view of the rebate plan 1095
The duty on aniline colors—The proprietary rebate plan—West Virginia oil fields—The burning of oil tanks 1149
The proprietary rebate plan 1203
A retailer's view of the rebate plan—The cash discount—The Standard's pipe line—Is it honest competition—Test for rosin in mineral oils 1204

CHEMICAL AND SCIENTIFIC NOTES:

Organic ultramarine—Impure alcohol—Vanilla from oats—Pure alumina 763
Azo dyestuffs, &c—Turkey red oil—Adulteration of archil 1060

D

Dyewoods, The consumption of 3
Dyestuffs from the cotton plant 26
Diphenylamine blue 37
Drug law for Kentucky, The proposed 37
Dye market, Annual review of the 83
Distilled red or elaine oil in soap making 122

Rosanilines, Homologous and Isomeric ... 1287
RECENT PATENTS:
Dyestuff or coloring matter; the same; the same; Tank for the storage of petroleum; Oil pump; Manufacture of artificial indigo; the same; Manufacture of soluble derivitives of indigo blue; Manufacture of fish guano; Preparation of new material for the manufacture of artificial indigo; Coloring matter or dyestuff; the same; Apparatus for filtering liquids; Turpentine still; Portable drilling machine for oil wells; Apparatus for the manufacture of turpentine and rosin; Method of treating maize and other grain in the manufacture of glucose, grape sugar and other products; Process of removing flocculent matter from spent acids; Manufacture of soda ... 84
Process of manufacturing glycerine from soap liquor; Manufacture of cream tartar; Corks for bottles; Bottle stop per ... 101
Bottle stopper; Treating phosphates for fertilizers; Rosaniline red coloring matter; Preparation of rosaniline blue coloring matter; Purple dyestuff or coloring matter; Manufacture of blue coloring matter; Process of treating mineral pyrites, and sulphides for the manufacture of sulphurous and sulphuric acids; Trade marks ... 102
Treatment of resin oil for mixing paints; Labels ... 149
Bottle stopper; Manufacture of cream tartar; Drop bottle; Manufacture of carbonate of potassium; Lubricant; Manufacture of gelatine and glue from animal refuse or offal; Manufacture of higher homologues of phenol; naphthol and resorcine; Corroding house for the manufacture of white lead by the old Dutch process; Preparation of chlorline; The same; Labels ... 225
Filter; Distillation of coal tar; Manufacture of soluble alumina; Process of treating ammoniacal salts; Filter; Apparatus for manufacturing sodium hyposulphite; Filter; Trade marks; Labels ... 276
Manufacture of aluminous cake: Coloring matter or dyestuff; the same; the same; Trade marks; Refined petroleum ... 324
Bottle stopper fastening; Manufacture of yellow coloring matter; Manufacture of colors or dyestuffs; Apparatus for the separation or extraction of oil from vegetable substances; Manufacture of oil cake ... 340
Art of manufacturing starch; Fertilizer; Dyestuff or coloring matter; the same; Medical compound; the same; Manufacture of chinoline; Composition for drying paints and oils; Liquid dryer for oils; Trade marks; labels ... 389
Apparatus for distilling petroleum; Bottstopper attachment; Ejector for oil wells; Medical compounds; Apparatus for the continuous production of ozone; Medicinal tonic; Trade marks; labels ... 465
Medical compound; Calcimine; Trade marks; labels ... 485
Filter; Filter; Bottle stopper: Bottle stopper; Melting, refining and working out glass; Flaxseed cleaner; Stopper for bottles, jars, &c; Dose cup; Bottle stopper; Bottle stopper; Purification of alkaline solutions; Purification of alkaline solutions; Ozone generator; Process of and apparatus for distilling oil; Protecting oil tanks from lightning; Trade marks; labels ... 534
Manufacture of oil; Adjuster for oil well pumps; Compound for absorbing oils for burning and illuminating purposes: Dyeing blue colors upon textile fabrics; Manufacture of blue coloring matter; Trade marks; labels ... 616
Drive pipe and coupling for oil wells; Means for attaching caps to bottles; Machine for blowing window glass; Apparatus for decomposing fats and oils; Art of making soap from fat; Bottle stopper fastener; Valve of oil wells; Sponge fishing net: Temper screw box for oil wells; Bottle stopper; Bottle and bottle stopper ... 681
Bottle stopper of celluloid; Apparatus for filling capsules; Insecticide compound ... 682
Trade marks; labels ... 682
Bottle stopper; Machine for cutting off capsules; Cushion protector for bottles; Oil well boiler; Apparatus for desiccating animal matter for fertilizers; Apparatus for the manufacture of red lead; Bottle wrapper ... 731
Process of and apparatus for making pills Machine for manufacturing pills; Percolator; Manufacture of root or tonic beer; Machine for making pills; Double catheter; Ink for dyeing purposes; Manufacture of pyroxyline for use in topical printing; Production of coloring matter; Process for abstracting glycerine and apparatus therefor; Process of extracting glycerine from salt soap lye; Atomizer; Manufacturing crystaline anhydride of grape sugar from a watery solution of grape sugar; Apparatus for administering injections; Apparatus for crystallizing grape sugar; Method of treating mineral oils, &c; Process of treating certain derivatives of coal tar color; Dyestuff or coloring matter; the same; the same; the same; the same; the same; Manufacture of a new coloring acid; Production of naphthyl; Sulphate of soda salt; Dyestuff or coloring matter; Salicylate of chinoline; Benzoate of chinoline ... 785
Trade marks; labels ... 785
Process of and means for purifying glucose; Salve; Medical compound: Bottle stopper; the same: Apparatus for fumigating, disinfecting and ventilating vessels, &c; Device for treating the walls and tubing of oil wells ... 835
Combined label, guide slip and wrapper for bottles; Manufacture of brown dyestuffs; the same; Compound for removing stains; Trade marks; labels ... 883
Manufacture of coloring matter; Method of removing iron from ferruginous saline solutions; Recovery of plumbic dioxide from ferruginous solutions; Bottle wrapper; Manufacture of red coloring matter; Preparation of material for manufacture of artificial indigo; Bottle stopping device: Manufacture of artificial indigo; Preparation of material used in the manufacture of artificial indigo: Artificial indigo; Tartrate of oxychinoline; Hydrochlorate of oxychinoline; Grinding and sieving caustic alkali; Grinding and sieving caustic alkali; Labels ... 965
Manufacture of glucose or grape sugar; Process of and mechanism for distilling hydrocarbons; Nippers for opening bottles; Drawer pull; Apparatus for the manufacture of alcohol; Means for protecting oil tanks from lightning; Measuring bottle stopper; Trade marks, labels ... 1019
Apparatus for rectifying petroleum; Packing bottles and other articles; Preparing phosphoric acid from bones; Manufacture of anthracene blue; Pro-

duction of blue colors upon textile fabrics; Trade marks 1085
Oil pump; Manufacture of oxide of lead; Treating ammonia liquors; Distilling ammonia; Obtaining magnesium sulphate from crude mineral; Collecting and utilizing carbonic acid gas from acidulous springs; Manufacture of indigo blue; the same; Manufacturing tannin extracts; Process of and apparatus for manufacturing tannin extracts; Administering anaesthetics; Protector for oil tanks; Manufacturing naphthaline into a form for carbureting; Purification of alkaline solutions obtained in the manufacture of soda; Bottle stopper; Manufacture of sugar of milk; Trade marks 1193
Detergent Compound; Trade marks 1237
Pill packing box; Process of and die for making Pill boxes; Bottle stopper; Process of and apparatus for obtaining oil; Apparatus for extracting tannic acid; Lubricant; Process of obtaining Ferrocyanides from gas liquor; Apparatus for stopping bottles; Process of obtaining cyanides 1299
